Роль библиографических списков в статье

Чтение научной литературы способствует созданию нового знания

Публикационная активность и финансирование напрямую связаны с использованием научных ресурсов

Journal use and research outcomes: a thought experiment

CIBER institutional indicators

“При двукратном увеличении количества скачиваемых статей, с 1 до 2 млн происходит статистически значимое, резкое увеличение публикационной активности”, в том числе:

- 1) Рост количества статей на 207%
- 2) Рост количества диссертаций на 168%
- 3) Увеличение внебюджетного финансирования на 324%

Качество библиографических списков напрямую связано с цитируемостью статей

публикации в Scopus за 2012 г.

■ процитированные 1 или более раз ■ нецитированные

Правильное цитирование

Значение цитирования:

Помещает вашу работу в контекст, создает диалог

Отдает должное предыдущим работам, которые легли в основу вашего исследования

Сохраняет достоверность и точность научной литературы

Библиография в вашей научной статье

- Цитируйте основные научные публикации, на которых основана ваша работа
- Не увлекайтесь ссылками
- Будьте уверены, что вы полностью освоили материал, на который ссылаетесь. Не полагайтесь только на выдержки или отдельные предложения
- Избегайте излишнего самоцитирования
- Не увлекайтесь цитатами публикаций из одного региона
- Строго придерживайтесь формата, рекомендуемого Руководством для авторов

ScienceDirect как источник качественных ссылок

- Содержит более **2500** полнотекстовых электронных журналов - 25% издаваемых статей
- В открытом доступе **более 380** журналов, в том числе и 14 журналов издательства Cell Press (с 1995 года), рефераты всех статей
- Более **13** млн рефератов/полнотекстовых статей
 - Содержание сформировано с 1995 и далее
 - Ретроспективная коллекция вплоть до Vol. 1 Issue 1
 - Статьи еще не вышедшие в печать
- Электронные энциклопедии (Online Reference works) – 112 названий
- Электронный справочники (Handbooks) – 200 названий
- Электронные книги (e-books) и продолжающиеся издания (Books series) – более **33000** названий + MARC записи

Каждая пятая ссылка в библиографии ведет на статьи Elsevier

- ScienceDirect – это **23,9%** всех опубликованных в мире научных статей*
- **26%** цитирований, в том числе среди самых престижных журналов - 21%*
- Elsevier публикует **28,5%** среди **5%** наиболее цитируемых статей в мире*
- **62** журнала Elsevier занимает первое место в своей научной категории по импакт-фактору

Abstract

A Wireless Sensor Network consists of several simple sensor nodes deployed in an environment having as primary goal data acquisition. However, due to limited sensor communication range, oftentimes it is necessary to use a mobile sink node that will visit sensor nodes to gather up their collected data. An important aspect that must be taken into account in this case are the intrinsic limitations of the vehicle used, such as kinematic and dynamic constraints, since most of the vehicles present in our everyday life have such restrictions. Therefore, this work addresses the problem of planning efficient paths,

definition presented in section 2.

4.1.4. Types of outcome measures

This systematic review covers studies on both speech-language deficits and hearing-impaired cases; therefore, in quantitative studies, both speech production and speech comprehension measures are taken into account, such as the Goldman-Fristoe Test of Articulation (GFTA) (Goldman and Fristoe, 2000), percentage of constants correct (PCC) (Shriberg et al., 1997), correctness of pronunciation, task completion performance, word discrimination test (WDT) phonological assessment battery (PhAB) (Frederickson et al., 1997), phonological awareness (Gillon, 2004), hearing in noise test, sound pressure level, word recognition accuracy (WRA), BKB sentence test (Bench et al., 1979), average sentence level word accuracy, word naming score (WNS), and the word verification rate (WVR). In qualitative studies, the outcome measures are the interviews and/or questionnaires which were designed to address the research questions.

4.2. Information sources

The studies were identified by searching electronic databases, scanning reference lists of articles and engaging in consultation with experts in the field of information technology and speech therapy. No limits were applied to the languages the proposed VSTs were designed for. This search was applied to Medline, PubMed,² ProQuest Central,³ Web of Science,⁴ Allied and Contemporary Medicine (AMED),⁵ Informa Healthcare,⁶ Wiley Digital Library,⁷ Taylor & Francis,⁸ Springer,⁹ ScienceDirect,¹⁰ IEEEExplore,¹¹ and ACM Digital Library¹² electronic databases. The SpeechBite¹³ database was also searched. Finally, we tried GoogleScholar¹⁴ as an integrated and comprehensive academic search

**The Bkb (Bamford–Kowal–Bench)
sentence lists for partially-hearing children**
Br. J. Audiol., 13 (1979), pp. 108–112

Abstract

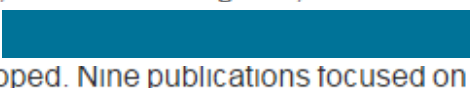

Linguistic guidelines for the design of sentences for speech audiometry with children are described, and new lists of test sentences which are based on such guidelines—the Bamford-Kowal-Bench Sentence Lists for Children—are introduced. Audiometric data relating to the use of the new lists are presented and discussed. © 1979, Informa UK Ltd. All rights reserved.

5.5. Intervention

Various samples of VSTs were introduced and adopted in the selected studies. All the studies introduced their own developed tools and used them for intervention except one study, in which previously developed software was used (Wild, 2009). Interventions varied based on the technical abilities of the VST used, the disorder targeted, and the intervention framework the SLPs had selected. Fig. 7 |  the intervention categories for which VSTs were developed. Nine publications focused on articulation (Chaisanit et al., 2010, Engwall et al., 2006, Eriksson et al., 2005, Fagel and Madany, 2008, George and Gnanayutham, 2010, Hawley et al., 2013, Massaro and Light, 2004, Schipor et al., 2010 and van Vuuren and Cherney, 2014) and eight publications considered phonological awareness intervention (Abad et al., 2013, Moore et al., 2005, Segers and Verhoeven, 2004, Silva et al., 2012, Stacey et al., 2010, Thompson et al., 2010, Wild, 2009 and Wren and Roulstone, 2008). One study dealt with the acoustic features of pitch, vocal loudness, and duration, which was categorized in phonation class (Cole et al., 2007). Two studies had the features to deal with all three categories of articulation, phonological awareness, and phonation, which were classified in the general class in the diagram (Danubianu et al., 2009 and Saz et al., 2009).

Journal: *2008 IEEE Fourth International Conference on eScience*

Year: 2008

Volume:

Issue:

Pages:

Abstract:

This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last.fm" (www.last.fm), can be applied to research, which potential it could have in the world of research (e.g. an open and interdisciplinary database, usage-based reputation metrics, and collaborative filtering) and which challenges such a model would face in academia. A real-world application of these principles, "Mendeley" (www.mendeley.com), will be demoed at the IE...

Journal: *Folding & design*

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

Abstract:

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

The screenshot shows the Mendeley Desktop interface. At the top, there is a search bar with the text "open access" and a dropdown menu with options: Authors, Titles, Publication Names, Year, and Notes. Below the search bar, the main area displays "Results for 'open access' in 'All Documents'". The results list includes:

- Ten-year cross-disciplinary comparison of the growth of open access and how it increases C Hajjem; S Harnad; Y Gingras – 2006 – arXiv preprint cs/0606079
- The access/impact problem and the green and gold roads to open access S Harnad; T Brody; F Vallières; L Carr – 2004 – Serials review
- When is open access not open access? Catriona J MacCallum – 2007 – PLoS biology
Author Keywords: Access to Information, Humans, Internet, Periodicals as Topic, Periodicals as ...been a spectacular growth in "open-access" journals. The Directory of Open Access ...
- Comparing the impact of open access (OA) vs. non-OA articles in the same journals S Harnad; T Brody – 2004 – D-lib Magazine
- Citation advantage of open access articles G Eysenbach – 2006 – PLoS biology

OPEN ACCESS Freely available online

PLoS BIOLOGY

Perspective

Why Full Open Access Matters

Michael W. Carroll^{*}
American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional.

is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

Why Support the Open-Access Financial Model?

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The tradi-

their demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

The screenshot displays the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". The main content area shows a document titled "Open Access Publishing Authors Want" by Rajiv Nariani and Leila Fernandez. A yellow sticky note is overlaid on the document, containing the text: "You 12/03/2014 16:08 This sticky note allows you to annotate your paper. You can also make notes to the right." The right sidebar has tabs for "Details", "Notes", "Contents", and "Enrichments". The "Notes" tab is active, showing a "Notes:" section with a text area and a "Annotations:" section with a text area. The "Annotations" section contains the text: "This paper has no annotations yet. You can add notes and highlights in the PDF viewer." A large grey arrow points from the top left towards the sticky note, and another grey arrow points from the sticky note towards the "Notes" panel.

Open Access Publishing Authors Want

Rajiv Nariani and Leila Fernandez

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. **Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals.** The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

"An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing fee

Поиск CSL Style

База данных Mendeley содержит более 6700 стилей

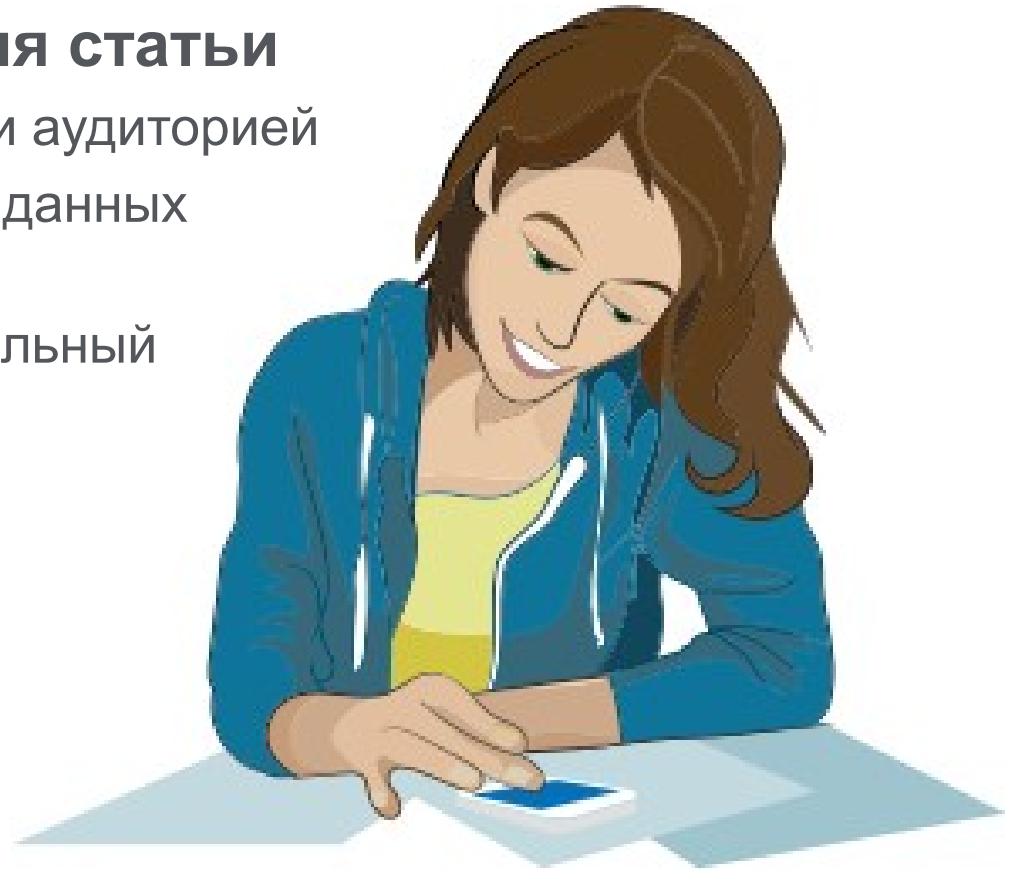

Выбор журнала

Подготовка статьи

До и во время написания статьи

- Определитесь с журналом и аудиторией
- Доступность и наглядность данных исследования
- Используйте ясный и правильный научный язык

Выбор журнала

Изучите возможных «кандидатов» чтобы выяснить :

- Тематику и целевую аудиторию журнала
- Принимаемый тип статей
- Читаемость и рейтинг
- Текущие «горячие» темы
 - просмотрите рефераты последнего выпуска
- Проведите поиск по базам данных научной информации ScienceDirect, Scopus.
- Ознакомьтесь с руководством для автора (Guide for Authors)

Выбор способа доступа к журналу

- По подписке – публикация бесплатна
- Open Access – публикация платная
- Hybrid journal – публикация бесплатна, но за плату можно перевести статью в открытый доступ

Total Energy Control Law

The diagram shows a control system for a hybrid energy system. It includes two 'Voltage-to-Energy Transformation' blocks: one for solar cell power ($\frac{1}{2} C_{SC} v_{SCREF}^2$) and one for fuel cell power ($\frac{1}{2} C_{SC} v_{SC}^2$). These feed into a 'Total Energy Control Law' block with gain K_{21} and a derivative operator $\frac{d}{dt}$. The output is compared with a reference power P_{Load} to produce a control signal λ . This signal is used for 'MPP' (Maximum Power Point) tracking and 'Dynamic Limitation' for both solar and fuel cell power. The solar power dynamic limitation block has a transfer function $\frac{1}{(\frac{s}{\omega_{s2}})^2 + 2\zeta_{s2}s + 1}$ and outputs P_{SolREF} , which is then limited by $\frac{I_{SolMax}}{I_{SolREF}}$ and $\frac{I_{SolMin}}{I_{SolREF}}$ to produce v_{Sol} . The fuel cell power dynamic limitation block has a transfer function $\frac{1}{(\frac{s}{\omega_{f1}})^2 + 2\zeta_{f1}s + 1}$ and outputs P_{FCREF} , which is then limited by $\frac{I_{FCMax}}{I_{FCREF}}$ and $\frac{I_{FCMin}}{I_{FCREF}}$ to produce v_{FC} .

Chemico-Biological Interactions publishes research reports and review articles that examine the molecular, cellular, and/or biochemical basis of toxicologically relevant outcomes. Special emphasis is placed on **toxicological mechanisms** associated with interactions between **chemicals** and **biological systems**. Outcomes may include all traditional endpoints caused by synthetic or naturally occurring chemicals, both *in vivo* and *in vitro*. Endpoints of interest include, but are not limited to **carcinogenesis, mutagenesis, respiratory toxicology, neurotoxicology, reproductive and developmental toxicology, and immunotoxicology**.

CBI discourages papers that are descriptive in nature and that do not address toxicological mechanisms (e.g., reports of toxicological effects without mechanistic data).

Cuckoos in raptors' clothing: barred plumage illuminates a fundamental principle of Batesian mimicry

Thanh-Lan Gluckman, Nicholas I. Mundy

DOI: 10.1016/j.anbehav.2013.09.020 Get rights and content

Highlights

- We quantified barred plumage in Old World parasitic cuckoos and sympatric raptors.
- We test whether distribution overlap predicts similarity in barred plumage.
- Cuckoos match sympatric raptors and similarity is rarely influenced by habitat.
- There is no match for any aspect of patterning in cuckoos and allopatric raptors.
- This conforms to Batesian mimicry and cuckoo–hawk mimicry may be widespread.

A fundamental principle of Batesian mimicry is that it pays to look like a local harmful species that is recognizable to other local species (receivers). Mimicking an allopatric species confers no benefit, as it is

The screenshot shows the ScienceDirect article page for "Human Kidney Disease-causing INF2 Mutations Perturb Rho/Dia Signaling in the Glomerulus". The page is annotated with orange circles and arrows highlighting key SEO elements:

- Title:** The article title "Human Kidney Disease-causing INF2 Mutations Perturb Rho/Dia Signaling in the Glomerulus" is circled in orange.
- Link:** The DOI link "doi:10.1016/j.ebiom.2014.11.009" is circled in orange.
- Authors:** The author list "Hua Sun^{1,1*}, Khalidou I. Al-Romaih^{1,2}, Calum A. MacRae^{1,2,3}, Martin R. Poliak^{1,1,1}" is circled in orange.
- Highlight section with keywords:** The "Highlights" section is circled in orange, containing a list of key findings.
- Abstract with keywords in context:** The "Abstract" section is circled in orange, providing a detailed summary of the study.

The "Highlights" section contains the following text:

- Dose dependent knockdown of zebrafish INF2 defines an overt glomerular phenotype.
- This phenotype is rescued by human wild-type INF2 but not by disease causing INF2 mutants.
- The developmental phenotype correlates with disinhibited diaphanous formin activity.
- The INF2 knockdown phenotype is rescued by knockdown of either RhoA or Dia2.
- INF2 mutations lead to uncontrolled Rho/Dia signaling and perturbed actin dynamics.

The "Abstract" section contains the following text:

Mutations in inverted Formin 2 (INF2), a diaphanous formin family protein that regulates actin cytoskeleton dynamics, cause recessive familial glomerulosclerosis (FGS) and Charcot-Marie-Tooth Disease (CMT) in humans. In addition to directly remodeling actin filaments in vitro, we have shown that INF2 regulates intracellular actin dynamics and actin dependent cellular behavior by opposing Rho/Dia signaling. As a step towards a better understanding of the human kidney disease, we wanted to explore the relevance of these findings to the in vivo situation. We used dose dependent knockdown of INF2 to first define an in vivo model and establish an overt glomerular phenotype in zebrafish. This simple assay was validated by rescue with wild type INF2 confirming the specificity of the findings. The edema, podocyte dysfunction, and an altered glomerular filtration barrier observed in the zebrafish pronephros correlate with mistrafficking of glomerular slit diaphragm proteins, defective slit-diaphragm signaling, and disinhibited diaphanous formin

The screenshot shows the ScienceDirect interface for an article in *Physics Letters B*. The article title is "Cross sections of the $p p \rightarrow K^+ \Sigma^+ n$ reaction close to threshold". The abstract states: "We have measured inclusive data on K^+ -meson production in pp collisions at COSY Jülich close to the hyperon production threshold and determined the hyperon-nucleon invariant mass spectra. The spectra were decomposed into three parts: Λp , $\Sigma^0 p$ and $\Sigma^+ n$. The cross section for the $\Sigma^+ n$ channel was found to be much smaller than a previous measurement in that excess energy region. The data together with previous results at higher energies are compatible with a phase space dependence." The "Data for this Article" section is highlighted with an orange circle and a callout arrow pointing to the text "Link to data repository".

Group Type

- Private**
Share references and full-text files. Only group members can see the group, good for sharing in private.
- Invite-only**
Share references only. Public can follow the group only, good for sharing references or reading lists.
- Open**
Share references only. Public can become a member or follow the group, good for crowd sourcing reading lists.
