Nonclassical Structures of Organic Compounds

V. I. MINKIN, R. M. MINYAEV,
AND Yu. A. ZHDANOV

Translated from the Russian by,
B. V. Rassadin, Cand.Sc. (Chem.)

Mir Publishers
Moscow

CONTENTS

Preface 5

List of Symbols 7

- 1 Molecular Structure 11**
- 1.1 Molecular Structure and Classical Theory 11
- 1.2 The Notion of a Nonclassical Structure 13
- 1.3 The Nature of Bonding in Nonclassical Structures 19
- 1.4 The Notion of Structure in Quantum Mechanics of Molecules 23
- 1.5 Development of the Methods for Theoretical Analysis of Molecular Structures 32
- 2 Orbital Interactions and Stability of Molecular Structures 37**
- 2.1 Orbital Approximation 37
- 2.2 Theory of Orbital Interactions 39
- 2.2.1 Interaction of Two Orbitals 39
- 2.2.2 Interaction Involving Several Fragment Orbitals 43
- 2.2.3 Bond and Group Orbitals 45
- 2.2.4 Molecular Orbitals of Ethylene and Methonium Ion 48
- 2.2.5 Orbitals of Cyclic Systems 53
- 2.3 Orbitals of Organometallic Fragments. Isolobal Analogy 57
- 2.4 Limitations Inherent in Orbital Approximation 62
- 2.5 General Propositions of Molecular Orbital Reconstruction Analysis 64
- 3 Pyramidal Structures 67**
- 3.1 Tetrahedrane 68
- 3.2 Cation $(\text{CH})_3^+$ 70
- 3.3 Pyramidane 73
- 3.4 Dication $(\text{CH})_3^{2+}$ and Its Analogues 74
- 3.5 Eight Electron Rule 78
- 3.6 Approaches to the Synthesis of Nonclassical Pyramidal Structures 83
- 3.6.1 Molecular Structure and Routes of Isomerization and Cycle Cleavage for Pyramidal Molecules and Ions 84
- 3.6.2 Route to Fixation of Pyramidane 89
- 3.6.3 Heterocyclic Pyramidal Cations 93
- 3.7 Effect of Structural Factors on Stability of Pyramidal Molecules and Ions 98
- 3.7.1 The Nature of the Apical Centre and Stability of C_{nv} Pyramidal Structures 98
- 3.7.2 Substitution Effects in Basal Fragments 100
- 3.8 Pyramidal Structures with Homoconjugated Cycles in the Basal Plane 104
- 3.9 Fenestrane and Its Heteroanalogues 108
- 3.10 "Two-dimensional Pyramid"—Three-membered Cycle 113
- 3.11 Pyramidal Structures with an Apical π -Bond 117
- 3.12 Pyramidal Structures of Organometallic Compounds 129
- 3.12.1 Nontransition Metal Compounds 130
- 3.12.2 Transition Metal Compounds 132
- 3.12.3 The Role of Bridging Links in Organometallic Clusters 136

10	Contents
4	Sandwich and Bipyramidal Structures, and Electron Count Rules for Polyhedral Compounds 140
4.1	Sandwich Structures 140
4.2	Sandwich Structures with Axial Two-atomic Fragments 146
4.3	Sandwich Structures with Homoconjugate Cycles 150
4.4	Bipyramidal Structures 151
4.5	Stability of Polyhedral Structures and Count Rules for Framework and Valence Electrons 156
4.6	Isolobal Analogy as a Methodology in Search for Nonclassical Organic Structures 163
5	The Role of p_{σ}-p_{σ} Interactions in the Formation of Polyhedral and Cage Structures 166
5.1	"Face-to-edge" Fragmentation of Polyhedral and Cage Structures 166
5.1.1	Strained Hydrocarbons $(CH)_n$ 166
5.1.2	Polycyclic Compounds with NO Bonds 170
5.1.3	Homotetrahedraes 176
5.2	"Face-to-face" Fragmentation of Polyhedral Structures 179
5.3	Valence σ -Bond Stretch Isomerism 188
5.4	p_{σ} - p_{σ} Interactions in Multilayer Structures 192
5.5	Structures of Molecular Crystals 196
6	Hypercoordinate Carbon and Hydrogen Centres in Organic Compounds 201
6.1	Pentacoordinate Carbon Atom 202
6.2	Hexacoordinate Carbon Atom 209
6.3	Carbon Atom in Carbide Clusters 213
6.4	Bridging Hydrogen Bond in Carbocations 215
6.5	Transition Metal Complexes as Structural Analogues of Nonclassical Organic Cations 224
7	Container Systems and Carriers 230
7.1	Container Systems 231
7.2	The Role of Orbital Factors in Stabilization of Macrocyclic Ligand Complexes 240
8	Nontetrahedral Tetracoordinate Carbon Atom in Organic Compounds 248
8.1	Planar or Pyramidal Methane? 249
8.2	Electronic Stabilization of Planar Tetracoordinate Carbon Atom 253
8.3	Pyramidal Tetracoordinate Carbon Atom 261
8.4	Potential Energy Surface of Methane 264
8.5	Spatial Constraint Imposed on Nontetrahedral Bond Configuration of Tetracoordinate Carbon Atom in Strained Structures 270
8.6	Planar and Pyramidal Tetracoordinate Structures of Nontransition Elements 281
